Legal Disclaimer

The White Paper is hereby integrated by reference, as it may be amended from time to time. I “Anser Mehmood” will distribute the DAAD Coin tokens (Tokens) to buyers (Buyer) pursuant to our contract. This project is non-commercial/non-profitable and dedicated solely to uplifting humanity and fostering peace and prosperity, supporting and advocating the UN SDGs agenda for implementation for a better tomorrow.

We don't have any representations or warranties, express or implied, of merchantability or fitness for a particular purpose with respect to the Tokens, their utility, or the ability of anyone to purchase or use Tokens. It hereby disclaims any representation, warranty, or undertaking in any form whatsoever to any institute or person, including any representation or undertaking, about the accuracy and completeness of any of the information set out in this white paper.

The content of this white paper is provided for informational purposes only and may change without notice. DAAD token does not make or claim to make high profits, nor is it responsible for any loss; Trading Crypto needs a lot of knowledge, experience, and technical support to invest.

No company parties represent or warrant that the process of purchasing and /or receiving Tokens or the tokens themselves will be uninterrupted or error-free. Consequently, the buyer acknowledges and understands that they may never receive Tokens and may lose the entire amount they paid to the Company.

The buyer would have to provide an authentic and accurate digital wallet address for receipt of any Tokens distributed to them according to the Contract. The Tokens are not securities, commodities, swaps, or financial instruments of any kind.

The purchasing and sales of Tokens are not subject to any law protection.

The information on the owner's website or in the white paper has not been examined or approved by any regulatory authority. No such action has been taken or will be taken under any laws, regulatory requirements, or rules of any jurisdiction. Any content of this website, the white paper, or any linked content does not imply compliance with a specific country's applicable laws, regulatory requirements, or rules. Any part of or any copy of the white paper on the website or in the document cannot be taken or sent to any country where dissemination or distribution of the white paper is prohibited or restricted.

I and my companies (along with its directors, officers, staff, and employees) do not bear any liability or responsibility for the correctness, accuracy, or completeness of the information contained within the White Paper. Furthermore, if the Buyer chooses to participate in the initial sale of Tokens, the Company does not assume any liability or responsibility for any loss of market value of Tokens.

We are not responsible for the individual actions and behaviors of our teams and volunteers.

The content and information in this White Paper may be challenging and require a high level of familiarity with cryptocurrencies to comprehend Tokens and associated risks. Readers and all relevant parties are encouraged to seek external advice. The company does not assume any responsibility for the decisions you take regarding the white paper. Concerning parties are solely responsible for making their own assessment of the matters, including assessing risks and consulting technical and professional advisors.

02 Abstract

This white paper is designed to examine the DAAD token, its utility, and its benefits to the investors, owner, and the world. The aim of the DAAD token is to promote human values, poverty, global sustainability, equality, and environmental protection. This goal is achieved by providing high-quality products and services around the globe.

DAAD token is supported by Binance smart chains, which is the most crucial blockchain in cryptocurrency. Anyone can invest in it in order to promote human rights globally.

Be a part of the DAAD token, support UN SDGs agenda and serve humanity, its values, and the environment.

03

Background The Problem

Global poverty is a significant and complex issue that impacts billions of people worldwide. Understanding this problem involves examining its causes, implications, current status, and potential solutions.

Global poverty refers to the economic condition in which people live with a lack of access to essential goods and services such as food, clean water, sanitation, education, and healthcare. The World Bank classifies extreme poverty as living on less than \$1.90 per day.

04

The Cause of the Problem

- There are many causes of global poverty, including:
- Economic factors: Unequal distribution of resources, lack of access to markets, and economic structural issues can perpetuate poverty.
- Political factors: Corruption, poor governance, lack of rule of law, and political instability can hinder economic development and perpetuate poverty.
- Social and cultural factors: Discrimination, lack of education, and deep-rooted social structures can keep certain groups in poverty.
- Environmental factors: Climate change, natural disasters, and lack of arable land can hamper agricultural output and lead to food insecurity.
- Health issues: Diseases like malaria and HIV/AIDS can reduce life expectancy and productivity.

While global poverty rates have decreased over the past few decades, challenges remain:

- The majority of people living in extreme poverty reside in Sub-Saharan Africa and South Asia.
- New challenges, such as the impact of the COVID-19 pandemic, have threatened to reverse some of the gains made in poverty reduction.
- Slow growth and implementation on United Nation's SDGs

05

The Impact of the Problem

As people become more engrossed with fulfilling the basic necessities of life, their inclination towards building assets and wealth becomes negligible. They pay little or no attention to wealth-building strategies, which cause them to have no assets.

06

The Solution

To Support UN SDGs, Development of Digital Technologies and To create more asset-building opportunities for everybody and , irrespective of their financial resources and background. DAAD cryptocurrency is our step in that direction. With DAAD crypto, we aim to help with poverty reduction by giving access to everybody to cryptocurrency.

With DAAD crypto, we aim to help with poverty reduction by giving access to everybody to cryptocurrency and digital technologies through;

Aid and development programs: Involving International organizations, NGOs, and governments can offer aid and implement development programs to directly address the needs of those in poverty.

Economic development: By focusing on inclusive economic growth, countries can help raise incomes and improve living standards.

Education and skill development: Investing in education can help break the cycle of poverty by equipping individuals with the skills needed for better-paying jobs.

Healthcare access: Ensuring that everyone has access to healthcare can prevent many of the illnesses that keep families in poverty.

Good governance: Reducing corruption and improving governance can help ensure that resources are used effectively to combat poverty.

Social safety nets: Providing safety nets like unemployment benefits, food assistance, and housing can help protect the most vulnerable.

07

Introduction- ICO and DAAD

DAAD is an ICO cryptocurrency, which allows investors to invest in this token and profit from it based on the basic rule of demand and supply. DAAD Token serves all values of human rights, global sustainability, and environmental protection. With DAAD tokens, we primarily aim to help Pakistanis who fall below the poverty line so that they are able to build their digital assets significantly.

The blockchain, an irreversible and decentralized technology that assigns a digital value to any material thing, intellectual labor, financial asset, transaction, or digital asset ecosystem, has been on the rise since its emergence. As a result, cryptocurrencies with economic worth are known as asset-backed cryptocurrencies.

An ICO (Initial Coin Offering) is the latest big thing in the field of finance. And we have integrated ICO with our drive to help humanity in order to create DAAD crypto. Understanding the problem of poverty in Pakistan and the opportunities presented by crypto, we began our journey. We leveraged blockchain to improve positive human rights and open the doors to prosperity for all.

08

DAAD Offering

An Initial Coin Offering ICO

DAAD ERC20 Token is an ICO cryptocurrency in Binance Smart Chain Main net. The token is implemented as ERC20, enabling global investors to invest in DAAD. This investment gives them the opportunity to trade or hold to earn % of the profit on blockchain technology, which is set by the industry on the basic rule of demand and supply.

The DAAD contract is verified with Binance smart chain, deployed in Pancake exchange, and will be registered in other exchanges as meeting listing requirements.

09

Our Methodology

The drive behind DAAD crypto is to provide equal opportunities to affluent investors and ordinary people through the same platform. We ensure this by offering high-quality, world-class products and services all around the globe. With DAAD tokens, people will have a better method of investing that will not only help them build assets but also play a part in reducing inequality, promoting human rights, supporting global sustainability, and encouraging environmental betterment.

DAAD Token acts as a fantastic platform for people with less money as well as for people who are interested in human rights protection and promotion. It exists as an ERC-20 protocol token within the Binance Smart Chain Blockchain Network. It is a layer two solution to scale the Binance Blockchain Network, unlike most other tokens that do not have underlying assets or any intangible value.

10

Our Motivation

The motivation behind DAAD crypto is nothing but equality. We aim to include cryptocurrency in every portfolio, including wealthy and financially-challenged people. We understand that wealth-building strategies are typically only accessible to the affluent, and our mission is to change that.

With DAAD tokens, we retake control of our financial system from the elite and aim to distribute it to everyone. DAAD token will help create an ecosystem that will allow more people to access and build digital assets, irrespective of their financial background.

The DAAD token will enable individuals and businesses to invest in high-ticket investments and cryptocurrencies simultaneously, and that too with confidence like never before.

Our vision is to raise funds and work for global peace by upholding justice, equality, and prosperity for everyone as the UN SDG agenda. In order to achieve that, we aim to work on social welfare and development projects in under developing countries.

11

DAAD Tokens

The fundamental unit of value within the DAAD cryptosystem is the DAAD coin token (“token”). Tokens provide inflationary-resistant digital value within the system. The DAAD token will be derived from a standard Ethereum ERC20 token and will be tradable on exchanges.

12

Token Features

THE DAAD TOKEN CAN BE USED FOR ITS MULTIPLE FEATURES, INCLUDING:

- 1. LIQUIDITY**
- 2. HOLDING**
- 3. TRADING**

1. LIQUIDITY:

Investment liquidity refers to an investor's ability to adjust their cash flow in response to ever-changing commodity prices and production costs for cryptocurrencies that can be traded. The dynamics of the overall crypto market are typically determined by liquidity.

DAAD Tokens can be converted to cash with ease and convenience. Investees don't have to worry about losing their coins. The more the investments, the more the liquidity. The DAAD token is ideal for people who would love to work for the betterment of the world and others while building their own assets.

12

Token Features

THE DAAD TOKEN CAN BE USED FOR ITS MULTIPLE FEATURES, INCLUDING:

2. HOLDING:

DAAD token works on the Binance smart chain blockchain, which is not only the largest crypto exchange by trading volume but it also offers exceptional holding services. BSC Holding ensures users' funds are safe by leveraging effective security measures and providing a Secure Asset Fund for Users (SAFU).

Our holding method, at the time of writing, is arguably one of the safest and eco-friendly methods to help investors earn passive income with great margins. DAAD token holding is especially useful for investors, irrespective of their knowledge regarding the crypto-world.

12

Token Features

THE DAAD TOKEN CAN BE USED FOR ITS MULTIPLE FEATURES, INCLUDING:

3. TRADING:

The DAAD token can also be used easily and efficiently for crypto trading. The transactions are secure, private, and digital, based on blockchain technology. You can perform the crypto trading via a separate crypto trading site or CFD trading account or buying and selling through a cryptocurrency exchange.

13

Token Details

Token name-----	Daad Token
Symbol-----	DAAD
Platform-----	Binance Smart Chain
Total Supply-----	2 Million Daad
Cerculating Supply-----	2 Million Daad
Decimals-----	18
Liquidity Providor LP(token owner)-----	Anser Mehmood
Date Deployed-----	January 9th 2022, 8:26:31 am

14

Token Advantages

- More secure
- Less expensive & computationally intensive
- More performant
- A decentralized foundation based on sound monetary policies
- Autonomous for investors

15

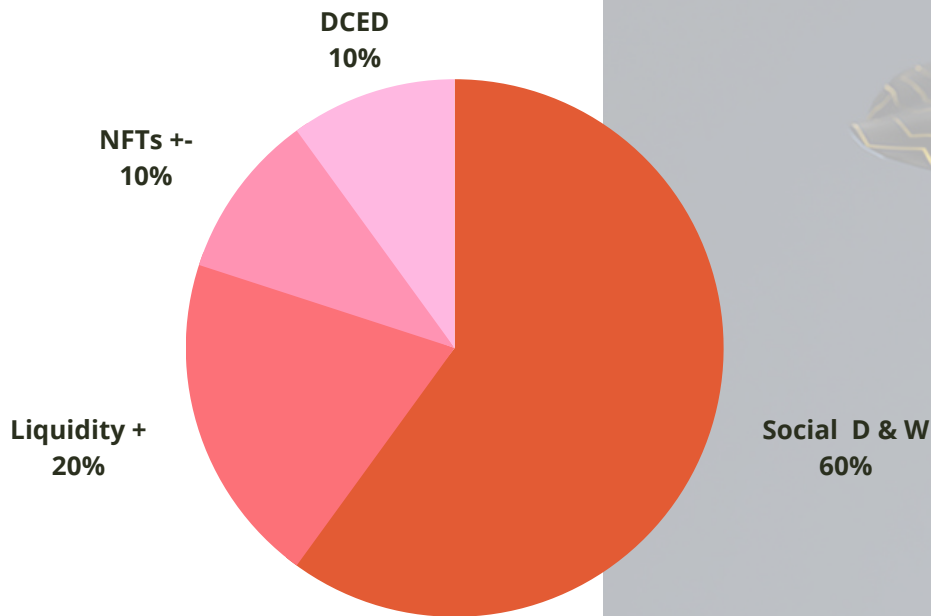

Contract Address:

0x9048d508dafb1933a173ba11c75f009bd93c8a31

16

Daad Token Utility

How we aim to use the raised funds:

As discussed earlier, our main focus is to work for the betterment of humanity, global sustainability, and poverty.

The funds we raise will be used according to our Token Utility;

- **Social Development & Welfare:** 60% trading fee raised for social welfare and development projects in underdeveloping Countries.
- **Liquidity :** 20% trading fee raised to add more token Liquidity every year.
- **NFTs:** 10% trading fee raised to invest in NFTs trading.
- **DCED:** 10% Trading fee raised to donate for crypto ecosystem development. (Preferably Binance Ecosystem)

17

Daad Roadmap to Achieve Goals

As we aim to help ordinary people, our action plan involves working on the grassroots level in Under developing countries. We plan to partner with NGOs, CBOs, NPOs, and other agencies worldwide to identify problems and provide solutions by engaging local stakeholders.

We Appeal to people to join us as volunteers to support our mission globally and we work altogether for better tommorrow.

Our goals and ambitions that led to the creation of DAAD crypto mean a lot to us. Therefore, we have built an efficient and highly functional roadmap to help us achieve those goals in the best way possible.

18

Daad Roadmap Phases

01

- Emergence and design idea
- Problem identification
- Crypto Name
- Program Plan designing
- Website construction & Launch
- Smart Contract design
- Setup and Deployment
- White paper Design & Publish

02

- Website & Token BSC launch
- White paper Publish
- Token Lock & Exchanges Listings
- Private Sale on Pancake swap
- Listing on Coinmarketcap & Coingecko
- Aggressive Marketing Rollout
- Donations
- Buy NFTs Collection

03

- Audits for Transparency (@techAudit/CERTi)
- Invitation for solid Partnerships with NGOs worldwide
- Appeal Corporate sector to support and donation
- Analytic tools integration
- Real-World Events
- Review Marketing Plans
- Donations Appeals
- NFTs Collection/Trading

04

- Launching Program
- DAAD World (NFT, Merchandise Marketplace AND CRYPTO CARD)
- Launching NFT Trading
- MOUs signing with Grass-root level NGOs, CBOs, local communities, etc.
- Further Marketing Plans
- Donations

The United Nations Sustainable Development Goals (UN SDGs) are a set of 17 interconnected goals that provide a shared blueprint for peace and prosperity for people and the planet, now and into the future. Established in 2015, these goals were adopted by all UN Member States as a universal call to action to end poverty, safeguard the planet, and ensure that all people enjoy peace and prosperity by 2030.

The SDGs are particularly influential and can impact the world in the following ways:

- 1. Shared Vision and Framework:** They offer a holistic, integrated, and universally accepted roadmap for peace and prosperity. By having a shared vision, nations can collectively work toward these objectives.
- 2. Mobilizing Investments:** By setting clear targets, the SDGs can guide investments from both public and private sectors to areas where they are needed most.
- 3. Benchmarking and Accountability:** The SDGs provide measurable targets that enable countries to track progress and be held accountable. This accountability mechanism encourages more robust efforts to achieve these goals.
- 4. Promotion of Partnerships:** The SDGs emphasize the importance of partnerships. Governments, civil society, the private sector, and communities can create synergies, pool resources, and share best practices by working together.
- 5. Encouraging Innovation:** The ambitious nature of the SDGs spurs innovation. New technologies, strategies, and business models are being developed to address these challenges.
- 6. Promoting Inclusivity:** The mantra of the SDGs is "Leave no one behind." This emphasis ensures that marginalized and vulnerable populations are prioritized and that interventions are equitable.
- 7. Raising Awareness:** The SDGs serve as a tool for advocacy. By raising awareness about the challenges the world faces, more individuals, organizations, and governments can be galvanized into action.
- 8. Crisis Prevention and Resilience Building:** By addressing root causes, such as poverty and inequality, and promoting sustainable practices, the SDGs can help prevent conflicts and build resilience against shocks like economic downturns or natural disasters.
- 9. Reaffirmation of International Cooperation:** In an increasingly interconnected world, the SDGs underscore the importance of multilateralism and international cooperation in addressing global challenges.
- 10. Integrating Sustainability:** The SDGs promote the idea that long-term prosperity cannot be divorced from environmental and social well-being. They advocate for a balanced approach to economic growth and environmental sustainability.

If effectively implemented, the UN SDGs have the potential to bring about transformative changes to our world. By addressing root challenges in an integrated manner, they can pave the way for a more just, equitable, and sustainable future for all. However, achieving this vision requires concerted efforts from all sectors of society, from governments to businesses to civil society and every individual.

The importance of sustainability and environmental stewardship.

Sustainability is the practice of using resources to meet the needs of the present without compromising the ability of future generations to meet their own needs. This means that we should be mindful of how we use resources and strive to use them in a way that is both efficient and responsible.

we should strive to reduce our carbon footprint by using renewable energy sources, such as solar and wind power, and by reducing our consumption of non-renewable resources, such as fossil fuels. We should also strive to reduce our waste by recycling and reusing materials whenever possible.

By taking these steps, we can ensure that our children and future generations will have access to the same resources that we have today.

*we all together
can change the
world into a better
place.*

Anser Daad

I am donating all my initial Liquidity provided to this project and fixing 10 % of annual profit of US company to add liquidity to strengthen market value of the project.

THANKS
